Internship Certificate

This is to certify that Martin Ombura, a student attending the University of Cape Town, has completed an internship with Effcomm SA for the period of 1 month from the 15th June – 15th July 2015.

During Martins time at Effcomm SA he and his fellow interns were tasked with implementing new pieces of functionality within our internal administration portal. The functionality was primarily developed in PHP (Zend Framework 2) and JavaScript, and they used MySQL as a storage platform. They maintained their code using source control to effectively collaborate their individual solutions, and made use of Atlassian Jira to manage their project in an agile fashion.

As a cohesive unit, all the interns took initiative in approaching the challenges presented to them. They explored best-fit solutions for our business models, and designed solutions to these issues in their own capacity. They approached the tasks using various UML techniques such as ERD's, wireframes and class diagrams, and built their own backlogs and sprints accordingly.

Martin has met and exceeded our expectations while working for the company. His ability to learn at a remarkable pace and adapt to our company culture was truly impressive. Martins work was of the best quality and constantly met all our requirements. His work ethic and dedication to his team was admirable and Effcomm SA found him to be a natural leader, a willing participant and an instigator of the overall success of the project. For all these reasons, and many more, Effcomm SA believes that Martin would be an asset to any company he chooses to join.

For any further information on the intern and their time spent at Effcomm SA, please feel free to contact Natheera Noor Mohamed at nnmohamed@effcomm.com or 021 447 0704.
